

Intelligent Content (icTools) for S1000D

- Improve Document Quality
- Reduce Cycle Time
- Automated XML
- Reduce Cost
- Ease of Use

Who needs icTools for S1000D?

icTools for S1000D is designed for organizations and teams that need to create, manage, and publish S1000D-compliant technical documentation—without relying on complex XML tools or outsourcing. It's ideal for aerospace and defense contractors, government agencies, and manufacturers who want to empower their subject matter experts, technical writers, and editors to work directly in Microsoft Word while the software handles all the XML generation and validation in the background.

The benefits you receive:

Automated XML – icTools automatically generates valid S1000D XML in the background. Authors don't need to write or even see XML code—eliminating the need for manual tagging and reducing the risk of syntax errors.

Reduce Cycle Time – Automated XML saves significant time. Using a similar XML-based icTools, the Air Force reduced the average publishing time from 29 days to 11 days!

Improve Document Quality – icTools provides customizable checks to ensure quality. Templates are also available to provide consistency.

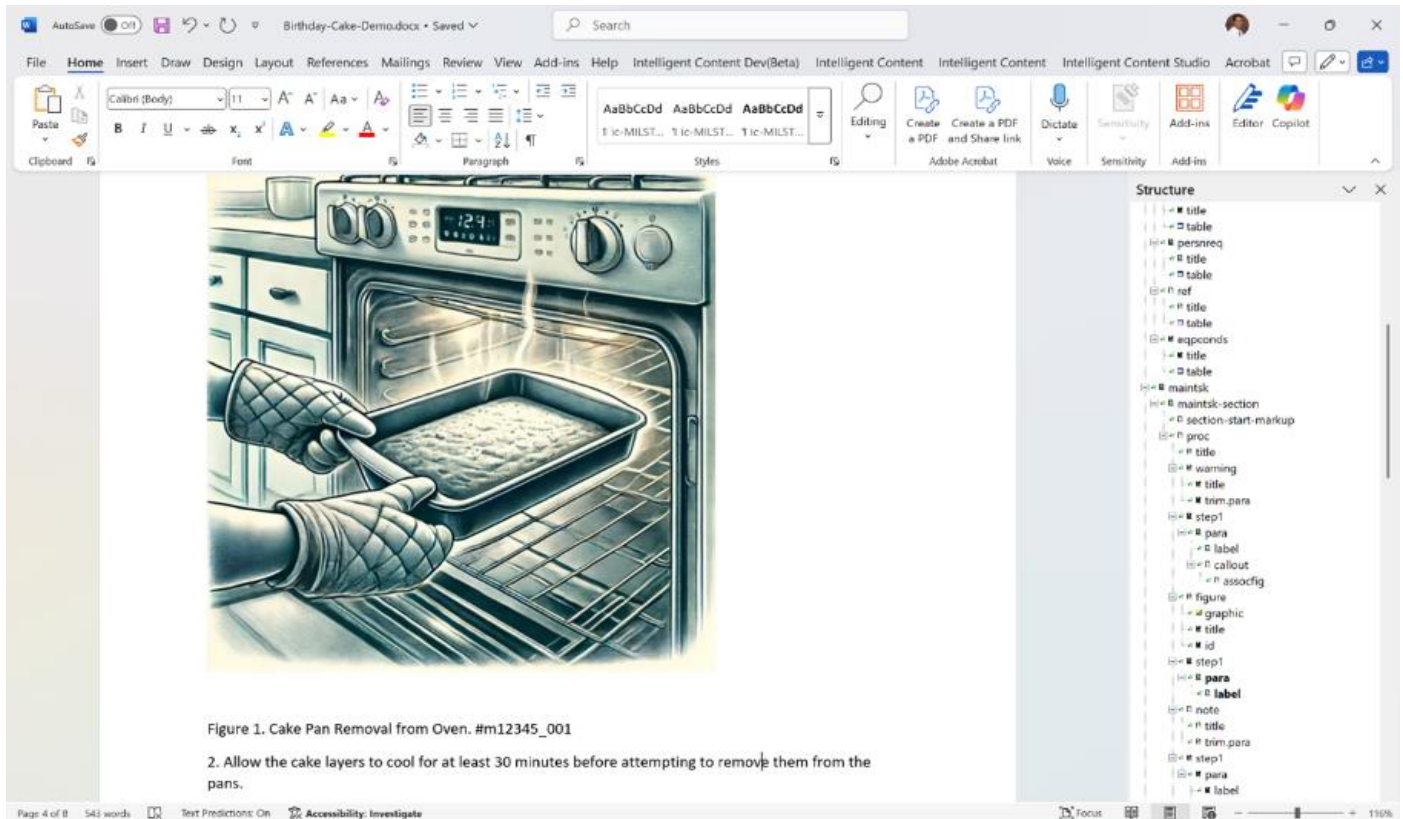

Reduce Cost – When you have icTools to automate your XML, that leverages your familiarity with Microsoft Word, cost savings follow. On a 5-year basis, the Air Force saved 60% cost using the software.
